Education

Shah & Anchor Kutchhi Engineering College

Bachelor of Technology in Computer Engineering

CGPA: **9.10/10.0**

Mumbai, India

Aug. 2023 – June 2027

Projects

TaskMate Pro — Full-Stack Task Management Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, JavaScript

- Architected a full-stack task management app with decoupled React frontend and Node.js/Express.js backend, implementing RESTful APIs for task CRUD, priority-based filtering, and asynchronous JSON data exchange
- Built a responsive React UI with real-time state management and 10+ modular, reusable components covering task cards, filters, and status indicators; optimized rendering performance by isolating state at the component level to minimize unnecessary re-renders
- Implemented client-side form validation with structured error feedback, enforcing data integrity across task creation and update workflows before API submission
- Deployed end-to-end with environment-specific configuration across development and production builds, ensuring consistent cross-browser behavior and seamless transitions between local and hosted environments

EduRights — Gamified Legal Awareness Platform for Children

Tech Stack: React.js, TypeScript, Tailwind CSS, Node.js, HTML5, REST APIs

- Designed and built an interactive React frontend delivering gamified legal education across 3+ modules with quiz flows, badge rewards, and progress tracking; enforced type safety via a TypeScript-typed component library with strict prop interfaces
- Translated Figma wireframes into pixel-accurate, interactive React components, maintaining design consistency across quiz flows, reward screens, and navigation elements throughout the product
- Built an accessibility-first UI following WCAG guidelines – contrast-compliant Tailwind color tokens, semantic HTML5, and keyboard-navigable flows – to serve a diverse younger audience across devices and browsers
- Decoupled content data from rendering logic to enable future multilingual expansion, allowing new language packs to be added without modifying any component code

TrueSight — DeepFake Detection Platform – Frontend & Analytics

Tech Stack: React.js, TypeScript, Tailwind CSS, Recharts, REST APIs, Data Visualization

- Owned the complete frontend and real-time analytics dashboard for a team-built deepfake detection system achieving **75% detection accuracy**; integrated asynchronous REST API calls with loading skeletons and error boundaries for graceful degradation on failed inference requests
- Built composable Recharts visualizations – confidence score gauges, detection event timelines, and performance metric bar charts – with 5-second auto-refresh, surfacing live model outputs without requiring direct backend access
- Optimized dashboard rendering for speed and responsiveness across devices, implementing periodic data refresh and client-side filtering to reduce perceived latency during high-frequency inference sessions
- **Shortlisted at Creathon** (college-level inter-team hackathon) for the project's real-world applicability in media integrity and misinformation detection

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Responsive Design, Accessibility (WCAG)

Backend & APIs: Node.js, Express.js, FastAPI, Flask, RESTful API Design

Databases: MongoDB, MySQL, Firebase

DevOps & Tools: Docker, Git/GitHub, Figma, Vercel, Render

AI Dev Tools: GitHub Copilot, Claude, Cursor (AI-assisted development workflows)

ML Fundamentals: Supervised Learning, NLP basics (coursework – TensorFlow, PyTorch)

Certifications

MERN Stack (Success Class of Engineering) — **Machine Learning & NLP** (Success Class of Engineering) — **Artificial Intelligence** (Edunets) — **Green Skills** (Edunets)

Extra-Curricular Activities

Secretary, Rotaract Club of Dombivli Midtown Youth – Led 100+ volunteers across 20+ community-driven projects spanning education, institutional outreach, and welfare initiatives; collectively impacted 2000+ beneficiaries across the Dombivli region through structured event planning and cross-team coordination.
